Services

Strategic and Policy Advisory

We provide strategic planning and policy advice to companies and the public to identify and craft the best possible policies and strategies for projects, ensuring that all aspects of the project are properly thought out, planned and managed

Project and Infrastructure Finance

We advise companies and government on the development of sustainable infrastructure solutions from opportunity study phases all the way to financial close, ensuring that we help you structure and raise structured financing on a limited or non recourse basis

PPP Advisory

Our team has been at the part of some of Africa's most recent PPP deals, providing comprehensive, strategic and commercial legal advice in connection with the development and financing of new PPP projects, privatization of existing assets, workout and restructuring of troubled projects and other transactions.

Procurement Support

We have been involved in designing and evaluating numerous infrastructure procurement request for qualification and proposal and can help public and private sector clients develop and respond to tenders using the most cost-effective and efficient procurement strategies for projects. We will provide guidance on the best contract terms, and pricing models to ensure that clients get the most value from projects.

Economic Development Advisory

Our economic development assessments and advisory help clients make informed decisions about their new or existing projects. By providing a comprehensive analysis of the economic impact of a proposed project, we can help clients measure and understand the potential economic costs and benefits associated with their decisions.

Carbon Advisory

Our team provide a service focused on helping clients understand and monetize carbon offsets, carbon credits and renewable energy credits, helping clients develop strategies to enhance their returns by monetizing carbon credits and renewable energy credits and reduce their carbon footprint, manage any potential carbon tax liabilities, and identify opportunities to offset their carbon taxes.

Corporate Advisory

We advise companies on strategic decisions regarding how to deploy and allocate their capital and the best means of structuring and raising financing. We also offer advice and execution support for acquisitions, sales, and fundraising to ensure you achieve your objectives with efficiency and confidence.

Transaction Support

We provide specialized, end-to-end transaction support solutions for mergers, acquisitions, disposals, and restructurings to maximize deal value and mitigate risks.

Restructuring

We offer comprehensive and reliable services to ensure that your refinancing process is completed quickly and efficiently. Our team of experts is involved through the entire process, from assessing current financial situations and selecting the best refinancing option to execute refinancing transaction. We provide comprehensive support including financial analysis and ongoing monitoring of new refinancing arrangements
